

Job Description for Research Assistant at IIIT-Delhi

ECOCOMETRICS LAB IIIT Delhi

Project Description:

The aim is to characterize, conceptually and empirically, climate change resilience of smallholder farmers in semi-arid regions with a focus on access to water (public provisioning infrastructure and the incidence of informal water markets), land use decisions and off-farm income (e.g., migration).

Role and Responsibilities

- Conduct literature review, compile information for a research report and article
- Code, analyze and write results of qualitative data collected as part of the study
- Participate in research meetings and related seminars
- Create data base of literature, interview data and other information relevant to the project

Qualifications and Requirements

- Candidate will have past experience in qualitative research methods and analysis.
- Have prior work experience in a research project/organization
- Strong written and verbal communication skills.
- Background in social sciences
- Knowledge of climate change will be a plus

Duration: 3 months to begin with (Extendable as per requirement).

Compensation commensurate with skill and experience.
