

## Job Title: Research Associate - AI Regulations

**Location:** [IIIT Delhi]

**Employment Type:** Full-time

### About Us:

IIITD is a cutting-edge research institution dedicated to advancing the understanding of technology's impact on society. We are seeking a highly motivated and intellectually curious researcher to join us and contribute to the field of political theory, specifically focusing on the regulations surrounding Artificial Intelligence (AI). This position offers a unique opportunity to shape the discourse around AI policy, governance, and ethics.

### Job Description:

As a Political Theory Researcher specialising in AI regulations, you will be responsible for conducting in-depth research, analysis, and critical examination of the political, ethical, and legal aspects of AI regulation. Your work will contribute to our organization's mission to provide valuable insights for policymakers, industry stakeholders, and the broader public. You will be an integral part of our research team and play a key role in shaping discussions around AI governance.

### Key Responsibilities:

1. **Research and Analysis:** Conduct comprehensive research into the political theory aspects of AI regulations, including policy frameworks, international cooperation, and ethical considerations. Stay up-to-date with the latest developments in AI regulation and related fields.
2. **Literature Review:** Review and synthesize existing academic and policy literature on AI regulations, identifying gaps and areas for further investigation.
3. **Policy Analysis:** Examine AI-related policies, legislation, and regulatory frameworks at the local, national, and international levels. Assess their impact on political systems and societal structures.
4. **Ethical Evaluation:** Evaluate the ethical implications of AI regulations, considering issues such as fairness, accountability, transparency, and the protection of fundamental rights.
5. **Collaboration:** Collaborate with interdisciplinary teams, including legal experts, computer scientists, and social scientists, to gain a holistic understanding of the AI regulation landscape.

### Qualifications:

- A Postgraduate or equivalent advanced degree in political science, political theory, public policy or a related field.

- Expertise in political theory, public policy analysis, and a deep understanding of the ethical implications of AI technology.
- Strong research and analytical skills, with the ability to critically assess and synthesize complex information.
- Excellent communication skills, both written and verbal, to convey research findings effectively to a wide range of audiences.
- Experience in interdisciplinary collaboration and the ability to work in a team-oriented environment.

#### **Benefits:**

- Monthly salary of 35,000
- A dynamic and collaborative research environment.

#### **How to Apply:**

If you are passionate about political theory, AI regulations, and their impact on society, and if you are eager to contribute to meaningful research in this field, we encourage you to apply. Please submit your CV, a cover letter, and relevant work samples to [rubina@iiitd.ac.in](mailto:rubina@iiitd.ac.in) before **10th November 2023**.

The cover letter should outline how your training has prepared you for the mentioned role, any expertise in ethics and policy of AI, and highlight any experience you have in handling and studying public policies.

IIITD is committed to fostering a diverse and inclusive work environment. We welcome applications from all qualified candidates
