
We're Hiring: Communications & Media Manager (Technology Focus)

Location: New Delhi

Type: Full-time | Hybrid/Remote options available

Experience Level: Mid to Senior

Are you a tech-savvy storyteller with a passion for translating complex ideas into compelling narratives? Do you thrive at the intersection of research, media, and digital communication? If so, we want to hear from you.

About the Role

We're seeking a dynamic **Communications & Media Manager** to lead our content and media strategy with a strong focus on technology. You'll be responsible for transforming cutting-edge research into engaging, accessible content for a broad audience—across blogs, social media, newsletters, and more.

What You'll Do

- Translate technical research papers and whitepapers into clear, engaging content for non-expert audiences
- Craft high-impact blog posts, tweets, LinkedIn updates, and other digital content that resonates with tech-savvy and general readers alike
- Collaborate with researchers, engineers, and product teams to uncover stories worth telling
- Manage and grow our media presence across platforms, ensuring consistency in tone, voice, and messaging
- Monitor trends in tech communication and digital media to keep our content fresh and relevant

What We're Looking For

- Exceptional command of the English language—grammar, style, and storytelling are your superpowers
- Proven experience writing about technology for diverse audiences (portfolio required)
- Ability to distill complex technical concepts into accessible, engaging narratives

- Deep familiarity with digital media platforms—Twitter/X, LinkedIn, Medium, Substack, etc.
- A proactive communicator who thrives in fast-paced, collaborative environments
- Bonus: Background in journalism, science communication, or technical writing

Why Join Us?

- Work with a passionate, mission-driven academic research team at the forefront of innovation
- Shape how the world understands and engages with emerging technologies
- Enjoy flexible work arrangements, professional development support, and a culture that values creativity and clarity

Salary & Job type:

- Up to 20 lakhs per annum. The salary will be decided based on the interview and negotiations.
- The job is a project-based contractual position, co-terminus with the project. The current offer will be till 31st July 2026. It may be extended in future based on project requirements.
