

## **IIT - Delhi to launch two unique B.Tech. Programs this year**

Indraprastha Institute of Information Technology, Delhi is going to launch two new B.Tech programs from the this academic year i.e. 2017-18. **BTech Program in Computer Science and Design** and **BTech program in IT and Social Science**- the two innovative programs, are very unique in it. These courses have never been provided by any other institution in India.

### **BTech Program in Computer Science and Design**

With the internet pervading all spheres of life, and most industries increasing their web presence and interactivity with stakeholders and customers, the demand for good design thinking is increasing. With increasing focus on user experience, the importance of Interaction Design and Design Thinking is also increasing rapidly in IT based products and services. This is true for the large software service providers also as customers are demanding better user experience.

- Eligibility/ Selection procedure -- admission to the program may be half from JEE and half from UCEED (the exam IITs conduct for Design). – ***Though it might change***
- Duration -- 4 year programme
- Total intake – 50
- Web link where info is there – N/A

### **BTech program in IT and Social Science**

Social Sciences and Humanities were earlier considered studies primarily about humans and societies and their programs were generally far removed from technology and sciences. Today, Information Technology and Computing is playing an important role in many social science subjects, and in some cases, like Social Media, technology and social science aspects have merged. On many problems, Social Sciences are using computing techniques to further understanding of Social Sciences and Humanities. This unique program, BTech in IT and SS, aims to develop IT engineers with strong understanding of relevant social science disciplines. The program will also allow a student to pursue further studies in social sciences, besides allowing students to pursue higher studies in CS/IT as well as many interdisciplinary programs.

- Duration – 4 year programme
- Eligibility/Selection procedure -- admission to the program may be based on class XII performance, as is done in DU and AUD. There is a possibility of taking half form JEE and half based on class XII marks. ***Though it might change***
- Total intake – 50
- Web link where info is there -- N/A
